Creme de Coco

C

Skin Cream

Coconut and Vanilla Skin Cream

Vanilla Bean Infused Rice Bran Oil 2 oz
 Organic Coconut Oil 2 oz
 Bees Wax .25 oz (3 teaspoons)
 Distilled Water about 2 oz. heated prior addition
 Mason Jar 8 oz size (weight 6.4 oz glass)

Use a electronic scale to measure weights.

Preparation of Infused Oil: To infuse oil, chop up fresh vanilla beans and combine with Rice Bran Oil in a Mason jar and using the SwissMixIt process, let it mix and extract for at least two days

Skin Dream Mixing:

First pour Vanilla infused Rice Bran Oil into Mason jar.
 Then add Coconut Oil (may be hard), and Bees Wax.
 Microwave 30 seconds. (solid waxes still visible).
 Microwave another 30 seconds. (all liquid, no solid waxes visible). If there are still visible beads of Bees Wax, microwave another 15-30 seconds until liquid.
 Put on mixer with mixing rotor. Medium, then high rotation.
 Heat up distilled water (tea pot used in this case).
 Add distilled water (about 1/2) with high rotation stirring.
 Visible microemulsion forming with good mixing. The goal is to mix as well as possible prior to waxes cooling down.
 As solution starts to turn white (cooling down and waxes are forming into solids combined with water), keep mixing. Use bamboo stir stick if needed to scrape sides.
 Before solution solidifies too much, insert metal object (in this case a butter knife) to attract magnetic rotor to remove. If you want to bottle the solution, now is a good time.
 Prior to cooling, poured into plastic filling syringe to put into 30 ml plastic squeeze tubes (travel and sample size).
 Made labels for Mason jar and squeeze tubes.

Summary: Silky smooth with a wonderful tropical scented aroma. No de-watering present in the final skin cream. Coconut oil solidifies and mixes well with distilled water and oil solution.
